

EndoRAAD Expansion at Bon Secours Dublin

Manitex recently managed the EndoRAAD Procedure Room expansion at the Bon Secours Hospital, Dublin bringing the total number of Procedure Rooms to Four.

The additional procedure room will enable the hospital to carry out more than 4,000 Endoscopy procedures annually, thereby broadening the capacity and quality of their Endoscopy and patient care services.

The Bons group started using the EndoRAAD Solution in 2013, which has expanded to include 14 procedure rooms in the 5 Bon Secours Hospitals in Ireland: Dublin, Cork, Galway, Tralee and Limerick. Endoscopy electronic patient records are centralised on the web based server in Cork, with a total of 225,946 procedures being performed during the last 9 years by over 133 endoscopists.

EndoRAAD is an integrated endoscopy clinical information system, covering the complete endoscopy clinical workflow and documentation. Since being first installed in 2003, almost 1,300,000 Endoscopy procedures have been recorded by more than 2,500 Endoscopists across 34 Hospitals in 20 cities in Ireland.

Bon Secours Health System, Ireland's largest Independent Hospital group, is distinguished for its quality service provision and rich healthcare culture. It is a non-profit organisation with a core mission of providing compassionate, world-class medical treatment to all its clients. Bon Secours Hospital, with about 3000 staff and 450 leading consultants treats in excess of 280,000 patients annually in its 5 modern acute hospitals across Ireland and a Care village in Cork.
