The Diver European Conference 2021 – Announcement

The 1st joint European Diver Users' Conference took place successfully on the 10th/11th June 2021, with well over 300 Online attendees. It included a dedicated Healthcare stream with a strong Irish flavour (see details below).

It was a free event for Diver customers and anyone who is considering implementing a Business Intelligence solution.

The Keynote session and technical presentations allowed all Irish Diver users a good opportunity to see the latest Diver features and Roadmap for the future.

The Healthcare stream covered a wide range of topics from the US, Continental Europe and Ireland.

It was a power-packed agenda:

- US Health System Evergreen had the agility to deal with all the issues thrown at it, as one of the first impacted by COVID-19.
- Community monitoring of pre-school Children in the Netherlands is critical for the government's duty of care.
- CEO praises ability of the Mater Misericordiae University Hospital to react to service demands.
- Endoscopy QA Programme in Ireland – real benefits in Quality Indicators achieved over several years.
- Irish CAMHS services empowered to deal with KPI reporting and analysis.
- Swedish monitoring of Orthopaedic care and Waiting Lists for Cancer Treatment.

All sessions will be available on-line until the 10th July. Anyone who has pre-registered can access the platform via the same link, The Diver Conference (hubilo.com). Anyone else who is interested in watching the recorded presentations, should first register via the following link: https://online.quaestio.com/survey/qst/DIVERCONFERENCE
