

HISI 2004 Conference

Health Informatics
Society of Ireland

Exhibition - Stand 8

"There's some interesting things happening in Health Informatics....."

Business Intelligence putting information at the organisations fingertips

- ❑ *St. Vincent's University Hospital deploys Business Intelligence Solution*
- ❑ *Mental Health Services in the Netherlands pilot national data repository*
- ❑ *Lee Memorial Health System: Increasing Patient Satisfaction*
- ❑ *Business Intelligence supporting information needs in Dublin Hospitals*

PACS, Radiology and TeleRadiology - Web based Solution

- ❑ *Beaumont Hospital – DICOM Archive, DICOM Worklists & HIS/RIS integration*
- ❑ *Filmless Radiology at Sonneberg & Neuhauser KKH, Sonneberg, Germany*
- ❑ *PACS, Radiology and Speech Recognition at Sued Harz Regional Hospital in Nordhausen, Germany*

Electronic Patient Record – modern technology for today's Health service

- ❑ *Beaumont Hospital continues to push the EPR Boundary forward*
- ❑ *Endoscopy & Ultrasound - Doctors capturing Images/ Video and Reporting in real-time*
- ❑ *Legacy PAS users in Germany evolve to browser based EPR*
- ❑ *Comprehensive clinical EPR supporting health care in Poland*

Financial Management – modernisation crucial to good management

- ❑ *Financial Performance Management showcased at seminar in the Adelaide & Meath Hospital*
- ❑ *Modern unified 'Smart' Ledgers operational in the UK*
- ❑ *Identifying and controlling costs for Hospitals & Clinical Directorates*

.....if any of these topics interest you please see over or come and visit Manitex and our partner B-Plan Information Systems at Stand 8 – we look forward to seeing you !

'New Dimensions in Health Informatics'

About Manitex:

MANITeX is a 'solutions' focused supplier of Information Technology products and services to the Health market. We offer a range of Services, Productivity Tools, advanced Technologies and Products that will enable our customers to modernise their Information Systems architecture, while maximising their current and future IT investments. **We specialise in delivering practical solutions to meet the real requirements of today in the Health market.**

FOR FURTHER INFORMATION PLEASE CONTACT :

Manitex Limited, Mounttown House, 62-63 Lower Mounttown Road, Dun Laoghaire, County Dublin, Ireland.
Tel: +353 1 280 3433, Fax: +353 1 230 2040, Email: info@manitex.ie, Web: www.manitex.ie

Exhibition - Stand 8

Management Information System

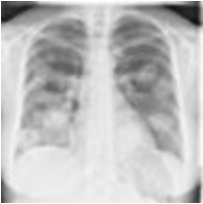

DI-Atlantis Business Intelligence Solution - A powerful easy to use Business Intelligence (OLAP) product with over 1000 customers worldwide. As well as wide Health usage in Scandinavia, France, Ireland and the USA, the product is used by many of the Global Fortune 5000[®] companies. It includes a full suite of reporting, analysis and visualisation tools to accommodate all levels of users. The tools provide an ideal solution for Health, where different uses will have a consistent but personalised view of their information for reporting, analysis and decision support irrespective of their location in the enterprise.

Compas Data Warehouse – A comprehensive data warehouse solution with powerful and intelligent interfaces to operational systems. It provides the framework for delivering vital management and clinical information to key areas of the organisation. It will facilitate the profiling of all aspects of the patient treatment as well as the monitoring and evaluation of activity and costs against performance criteria. It has a rules engine that facilitates automatic data validation, transformation and derivation. It has several inbuilt modules such as Service Planning, Scheduler, Import/Export, MDR Abstracts and DRG Grouper.

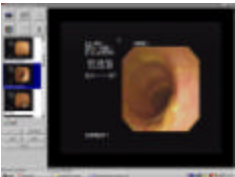

Electronic Patient Record (EPR)

NetRAAD - A combined Medical Image Management, PACS and Teleradiology System. It accepts images from DICOM and non-DICOM sources as well as scanned documents and media files. It supports the multi-media electronic patient record, which can include static images (e.g. X-rays, CT, MRI), motion pictures (e.g. video of endoscopic procedures), sounds files (e.g. voice comments, dictation), etc. Open and modular technology allows for the integration of NetRAAD modules with 3rd party systems (e.g. PACS, Radiology, EPR). Its unique architecture allows for the efficient distribution of images across various Networks (e.g. WAN, Intranet, standard Hospital network, Internet.) and low cost of ownership.

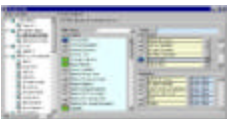

CliniNET – A comprehensive Electronic Patient Record system covering the range of contacts, treatment and activity relating to the patients stay in Hospital. Common technology with NetRAAD based on an open Web based architecture with Client access via a platform independent (Windows 95/98/NT, Apple, X-Windows) web browser (Netscape, Mozilla, Microsoft Internet Explorer). Open integration with back-end operational systems e.g. patient, clinical, laboratory, radiology, and pharmacy.

EndoRAAD - A complete Clinical Reporting System for procedures involving moving images e.g. Endoscopy, Ultrasound, Laparoscopy, Cystoscopy. It captures high quality single images or video sequences and allows these images to be incorporated by the doctor into a complete report on the patients procedure. EndoRAAD can be installed on a PC for a single procedure room or can be networked to interface to the Hospital Information System.

Financial Management

Aptos Smart Business Solutions - An integrated suite of modern client/server applications that deliver the advantages of best practice in finance and procurement. It includes General Ledger, Accounts Payable, Accounts Receivable, PO Management, Cash Management, Fixed Assets, Document Management, etc.

Synergy Costing - supports the continued drive to more robust and detailed costs, giving a truly effective, accurate and flexible costing solution. Both top/down and bottom/up methodologies are supported. All activities associated with a patient can be fully costed e.g. DRG's, procedures, treatment.

Synergy Budgeting - An excellent tool for Budget Setting, Budget Management and Budget Modelling. It supports fully incremental and zero based budgeting, including variance and trend analysis within multiple budget versions. Its modelling capabilities allow the user to perform 'What If' analysis on planning models.

DI-Atlantis is a product of Dimensional Insight Inc; NetRAAD, CliniNET & EndoRAAD are products of UHC Corp; Compas, Aptos & Synergy are products of B-Plan Information Systems
